Miguel Jay Faustino

Business Analyst moving into Data Engineering

Cavite, PH (UTC+8) · Open to remote · migueljayfaustino@gmail.com · certjay.github.io · github.com/CertJay · LinkedIn

Summary

Business Analyst (BS Information Systems, Data Science) with a track record of cleaning, validating and consolidating operational data in government and enterprise settings. Shipped two data systems (below). Now building Python and SQL pipelines toward a junior data engineering or analytics engineering role.

Experience

Business Analyst · Synkronous (remote) Apr 2026 – Present

- Run requirements discovery and gap analysis for an enterprise hospitality software implementation spanning about 20 integrated applications.
- Traced 120+ gaps between the business baseline and workshop findings into a severity-ranked register with source traceability.
- Wrote point-of-sale and property-management test-case workbooks (110+ cases), UAT plans, RAID logs and integration inventories.
- Consolidated a 12-session discovery workshop series with client IT, operations and vendor teams into a single source-of-truth knowledge base.

ICT Support Staff · Department of Education, Dasmariñas Nov 2025 – Mar 2026

- Consolidated ICT inventories and internet-subscription data for 45 schools to regional standards; built stakeholder databases and audited billing, provider and speed data in advanced Excel.

Data Management Associate · TESDA Assessment Center Aug 2025 – Oct 2025

- Cleaned, validated and standardized trainee and program records; produced operational and statistical reports from spreadsheets and database queries.

IT Intern · Department of Education, Dasmariñas Feb 2025 – May 2025

- Configured LAMP and LEMP stacks on Ubuntu; built network racks and set up routers for multi-ISP failover.

Projects

e-QUAART · assessment results management and analytics · github.com/CertJay/e-QUAART Shipped

- Captures results via grid entry and CSV/Excel import, validates each record against a schema, and routes it through a submit-verify-return queue before analytics.
- Classifies results by configurable performance levels and finds learning gaps by learner, class, school and division; tracks interventions through reassessment.
- Idempotent year-end rollover; SQLite build for single schools and a PostgreSQL branch for division-wide use; role-scoped access for 10 user types with audit trail.
- TypeScript, Express, Prisma, React, Vitest, Docker Compose, GitHub Actions CI. Demo data: ~79,000 results, ~2,600 learners, 9 schools.

School Division Dashboard · Python, pandas, Streamlit, Plotly (internal) Shipped Oct 2026

- Consolidated four Excel sources into one role-based dashboard with KPIs, filters and CSV export; cleaned data on load, encoded business rules as derived fields, and loaded only each role's files.

In progress: Excel Validation Cleaner, Invoice PDF to Database, Onboard Spend Pipeline (Airflow, Docker, PostgreSQL)

Skills

Data	SQL, MySQL, PostgreSQL, SQLite, data cleaning and validation, data modeling, Advanced Excel, Google Sheets, Power BI
Programming	Python, pandas, Streamlit, Plotly (in active study), Git and GitHub, GitHub Actions; next: Airflow, dbt, Docker, BigQuery, AWS
Infrastructure	Linux (Ubuntu), LAMP/LEMP, networking, multi-ISP redundancy
Analysis	Requirements and gap analysis, data mapping, UAT and test design, Agile, SDLC

Education

BS Information Systems, major in Data Science · Kolehiyo ng Lungsod ng Dasmariñas 2021 – 2025

Dean's Lister all four years · Class President · Mentor Committee Head

Certifications

DataCamp: SQL Associate, Python Data Associate (2025) · Cisco: Data Analytics Essentials, Introduction to Data Science (2026) · DataSense: Data Analytics with Power BI, Statistics with Microsoft Excel (2025). Verification links at certjay.github.io.
